

The number of Actcast partners has surpassed 50 ~Expanding the practical AI/IoT ecosystem~

May 27, 2020
Idein Inc.

Tokyo, May 2020 -- Idein Inc. is pleased to announce that the number of partners on its Edge AI platform Actcast, which was officially released in January 2020, has surpassed 50.

A wide variety of partners

As of today, 53 companies are participating as partners, and their attributes are diverse advanced AI algorithm developers, system developers and business enterprises.

Our goal through the expansion of Actcast Partners/Actcast ecosystem

We aim to build a platform to realize a popularization of edge AI/IoT systems.

There are many elements to the development, implementation, and utilization of AI/IoT systems, which makes it difficult for a single company to achieve. Actcast delivers the best combination of places, technologies and resources through its ecosystem. Currently, the ecosystem has originated use cases; PoC at a major convenience store and the development of a new anti-COVID-19 solution in collaboration with a major system developer.

About Actcast and Actcast Partners

Actcast is a platform which is installed in our unique acceleration technology that enables high-accuracy edge AI analysis on general-purpose devices that are easy to procure and inexpensive, enabling remote management (app installation, switching, updating, etc.) of large numbers of edge devices on the Web. It can be used in a variety of fields, including security, industrial IoT, retail marketing, and MaaS. In AI/IoT systems, there is a big trend to utilize not only the cloud, but also the computational resources at the edge, but there are still challenges in the practical use of these resources. We developed Actcast as an innovative technology and platform to solve the problems.

Actcast Partners is a partner program that aims to develop solutions and support businesses that use Actcast. The program provides participating companies with the opportunity to co-creation within the ecosystem and the following benefits:

https://actcast.io/docs/files/partner_program.pdf

- Introduction from/to other partners
- Early access to technology and features before they are released to the public
- Providing a development roadmap
- Invitation to workshops and events
- Introduction from/to customers
- Introduction of Actcast use cases
- Support for marketing activities

About Idein

Idein is a startup with high technological capabilities that has made accelerating deep learning Inference on the Raspberry Pi, an inexpensive general-purpose device. Idein has developed Actcast(<https://actcast.io/>), the edge AI platform using the technology, and provides services to developers and companies that develop, implement, and utilize practical AI/IoT systems. Together with our partners, we will continue to contribute to the popularization of AI/IoT systems.
